

If you are a Professional in the industry.

You cannot afford to miss this event

Privacy is the buzzword in all corporate rooms. It affects both the IT and Non IT industries. It disrupts the current hierarchy of CxOs and creates new career opportunities as Data Auditors and Data Protection Officers.

Innovative technologies need to accommodate complex Privacy Considerations. More than 130 countries in the world have their own data protection laws and expect all of them to be simultaneously complied with by the industries.

Behind all the challenges posed by Data Protection Law and Practice, there are also many exciting opportunities to harness. Learn about these opportunities from experts over the three day virtual conference at Indian Data Protection Summit 2021 (IDPS 2021) to be held on November 17,18, 19 2021.

Discussions will cover Data Protection Laws in India and abroad, Technology Issues and Management Issues.

Don't Miss the opportunity to attend this high value conference available free and on the virtual mode.

Conference starts at 2.00 pm (IST) each day and ends at 8.00 pm. Block your calendar today.
